Data Analyst | SQL | Python | Tableau | Power BI | Statistical Analysis | Data Visualization | Data-Driven Decision Making

Experience

Data Analyst Intern | Bluestock Fintech (Remote)

May 2026 – Present

- Gather, clean, and organize 25K+ financial and operational records from diverse sources using SQL, Python, and PostgreSQL, ensuring data integrity and accuracy for business reporting.
- Apply statistical methods and write 15+ advanced SQL queries (CTEs, Window Functions) to interpret data, reducing query execution time by 18%.
- Develop and maintain ETL workflows and data collection processes for 20K+ records, improving reporting accuracy and reducing manual errors.
- Design 5+ interactive Power BI dashboards and KPI reports, presenting actionable insights to stakeholders to support data-driven decision-making.

Data Analysis Intern | Cognifyz IT Solutions

Jun 2026 – Jul 2026

- Cleaned and transformed 15K+ records using SQL and Python (Pandas), maintaining data integrity and accuracy for downstream analysis.
- Collaborated cross-functionally to build 5+ Power BI dashboards, accelerating KPI tracking and decision-making across teams.
- Applied statistical and trend analysis to surface 10+ actionable customer transaction insights, uncovering **Rs. 12K** in recoverable revenue leakage from delivery operations.

Technical Skills

Data Analysis: SQL, Advanced Excel (Pivot Tables, VLOOKUP), Power BI, DAX, Power Query, Tableau

Programming: Python (Pandas, NumPy, Matplotlib), Git

Databases & Data Systems: PostgreSQL, MySQL, ETL, Data Collection, Data Cleaning & Wrangling

Analytics: Statistical Analysis, KPI Analysis, Forecasting, Trend Analysis, RFM Segmentation, A/B Testing, Root Cause Analysis

Business & Reporting: MIS Reporting, Dashboard Development, Data Visualization, Stakeholder Reporting, Process Improvement, Reporting Automation

Projects

1. Sales & Revenue Intelligence Dashboard

SQL, Python, Power BI

- Analyzed **120K+ sales transactions** to identify revenue trends, patterns, and operational inefficiencies that inform business strategy.
- Built KPI dashboards in Power BI tracking revenue, profit margin, Average Order Value, and YoY growth for stakeholder reporting.
- Automated operational reporting workflows using SQL and Power Query, improving process efficiency and replacing manual report builds.

2. Customer Behavior & RFM Segmentation

SQL, Python, Power BI

- Analyzed **50K+ customer records** using SQL and statistical methods to identify engagement patterns, churn risks, and retention trends.
- Applied RFM segmentation and statistical analysis in Python for actionable customer classification and targeting.
- Built Power BI dashboards tracking retention metrics, purchase frequency, and segment performance for cross-functional teams.

3. Retail Demand Forecasting & Inventory Analytics

SQL, Python, Power BI

- Analyzed **100K+ retail sales records** using SQL and statistical methods to forecast product demand and optimize inventory planning.
- Built trend-based forecasting models and KPIs including stock turnover, reorder frequency, and inventory efficiency.
- Developed Power BI dashboards for operational reporting and performance monitoring, driving process improvement recommendations.

Certifications & Achievements

- Microsoft Certified: Power BI Data Analyst Associate (PL-300)
- Databricks AI Fundamentals Certification
- Earned 5-Star SQL badge on HackerRank
- Solved 200+ SQL problems and completed the SQL (Advanced) certification

Education

Bachelor of Technology in Computer Science & Engineering

2022 – 2026

Veer Bahadur Singh Purvanchal University
